ABOUT US

A REPUTABLE HISTORY

Founded over 30 years ago, Brubin Pumps is a South African market leader in its field. As a division of Letaba Pumps, we are proudly part of Torre Industries. Our brand is known throughout the Southern African region as an established local manufacturer and supplier of magnetic drive pumps and process pumps (backed by internationally known manufacturers), as well as vacuum solutions, high viscosity pumping, submersible drainage pumps, high volume air conveyance and positive displacement pumping. The ongoing relationships we have formed over time with our international principals ensures Brubin Pumps' ability to combine top end product quality with high service levels. And, our after-sales and repair services provide customers with fast, efficient support on all levels.

RELIABLE SOLUTIONS ON TIME

WASTE WATER, INDUSTRIAL EFFLUENT & BIO GAS

Allprime self-priming centrifugal pumps have gained the acceptance of leading consultants and municipalities throughout Southern Africa.

Rugged design, reliability, economically priced and spare parts.

Solutions include:

The Vogelsang range of Rotary Lobe pumps.

Rota Cut - with its foreign material separator for conditioning processes and plant protection.

X-Ripper - turning solid matter into pumpable material.

MINERAL PROCESS, CHEMICAL, PRECIOUS METAL REFINERIES & OTHER END-USERS

Brubin peristaltic heavy-duty hose pump:

Handles viscous slurries by providing a cost effective, environmentally friendly solution to transfer and dosing applications.

Brubin peristaltic roller roller hose pump, for low flow and low pressure applications.

GREEN TECHNOLOGY APPLICATIONS

Brubin represents various leading brands including Robuschi:

An international manufacturer of low pressure and vacuum solutions.

REPRESENTING LEADING BRANDS

Our international principles enforce stringent standards and have established procedures to assure product consistency through all aspects of their manufacturing processes.

- Tuthill - is a manufacturer of pumps, blowers, vacuum systems, meters and plastics that help fuel some of the world's most impactful industries
- Cutes Vacuum Pumps
- Petroland Gear Pumps

Torre Holdings (Pty) Ltd has been independently rated as a Level 3 Contributor for its Broad-Based Black Economic Empowerment certification and are also ISO 9001/2015 accredited.

BLOWER & VACUUM PUMPS

SERIES

RBS

DESIGN	Positive Displacement, Rotary Blower
MATERIAL	Cast Iron
FLOW RATED	25000 m ³ /hr
PRESSURE VACUUM	1000 to -500 mbar

SERIES

RSW

DESIGN	Oil Free Screw Compressor
MATERIAL	Resistant to Oxidation
FLOW RATED	12500 m ³ /hr
PRESSURE	Up to 2500 mbar

SERIES

RVS

DESIGN	Single Stage Liquid Ring Vacuum Pumps
MATERIAL	Cast Iron, Stainless Steel
FLOW RATED VACUUM	4200 m ³ /hr Up to 33 mbar abs

SERIES

CPS, CPV, CPD, CE

DESIGN	Liquid Ring Vacuum Pump
MATERIAL	Cast Iron, Bronze, Stainless Steel
FLOW RATED HEAD RATED	Up to 37500 m ³ /hr 33-742 mbar

SERIES

EL, ES

DESIGN	Integrated Compression Package
MATERIAL	Steel
FLOW RATED HEAD RATED	10000 m ³ /hr 500 mbar

SERIES

HB

DESIGN	Side Channel Blower
MATERIAL	Aluminium
FLOW RATED HEAD RATED	19 m ³ / min 0 - 700 mbar

WASTE WATER

SERIES

ALL PRIME S & I

DESIGN	Self-priming, centrifugal
MATERIAL	Cast Iron, 316SS, ADI, CD4MCU
FLOW RATED	1250 / 300 m ³ /hr
HEAD RATED	43 / 60 m

SERIES

TURO ITALIA - EGGER PUMPS

Non-clogging TURO Pumps that permit an unobstructed passage for solids handling applications. Pump ends available in: Cast Iron, Hastelloy, Stainless Steel 316, Nickel and Titanium

- TURO fully recessed impeller submersible pump with flows up to 650 m³/h at 90 m heads with 110 kW maximum power
- EO/EOS semi-open vane impeller submersible pump with flows up to 2000 m³/h at 90 m heads with 250 kW maximum power
- TURO for large irregular solids and shear applications
- EOS for smaller solids and 25% entrained air

WASTE WATER/ BIO GAS

SERIES

VX 186/136 – THE ALL-ROUNDER IN SIMPLE AND EFFICIENT WASTE WATER TREATMENT

DESIGN TYPE	Rotary Lobe Pump
MAX CAPACITY	VX136 – 182 m ³ /h VX186 – 362 m ³ /h
MAX PRESSURE	VX 136 – 12 Bar VX186 – 12 Bar
MAX SPEED	VX136 – 800 min ⁻¹ VX186 – 600 min ⁻¹

SERIES

X-RIPPER

DESIGN	Macerating high volume materials and bulky components and permits high throughput rates
MAX PRESSURE	2-9 Bar
MAX BALL DIAMETER (MM)	8-15mm
MAX TORQUE (NM)	300-2400
THROUGHOUT	40 m ³ /h – 680 m ³ /h

SERIES

ROTA CUT RCQ/RCX

DESIGN	High performance macerator and solids separator with geared motor
FLOW RATED	90 m ³ /h – 750 m ³ /h
MOTOR POWER	1.1kW – 15kW
DESIGN TYPE	Inline, Cyclone, MXL, Compact, M/MX
OVERVIEW	
CUTTING SCREEN WITH AVAILABLE FREE PASSING	10/15/20 up to 8/12/16/34 (mm)

DRAINAGE

SERIES

PIRANAH

DESIGN	Submersible Grinder ABS Pumps
MATERIAL	Ductile Cast Iron
FLOW RATED	Up to 21 m ³ /h
HEAD RATED	Up to 71 m
MOTOR POWER	1.02 -11 kW/1.34 - 16.8 kW

SERIES

JS, XJS

DESIGN	Submersible Sludge Pumps
MATERIAL	Ductile Cast Iron
FLOW RATED	36 m ³ /h
MOTORS UP TO	11.8 kW

SAER PUMPS

SAER Elettropompe S.p.A. is a leading Italian producer and supplier of surface and submersible pumps and motors, with over 60 years' experience in the Italian and international markets. Brubin Pumps, a division of Letaba Pumps, offers SAER Range as part of an all-round solution to our customers - with maximum flexibility and innovation.

- Centrifugal end suction
- Submersible
- Vertical & horizontal multistage
- Split casing
- Borehole pumps & motors
- Domestic range of pumps
